REGULATIONS REGARDING STATUTORY RESERVE REQUIREMENTS

Effective from 28 October 2020

Content

- Part A Overview
- Part B Qualifying Liabilities and Reserve Requirements Ratios
- Part C Reserve Computation and Maintenance Periods
- Part D Reserve and Settlement Accounts
- Part E Drawing on Balances held in Reserve Accounts
- Part F Non-compliance with the level of Reserve Requirements
- Part G Operational Procedures
- Annex 1 Effective Reserve Requirements Ratios

Annex 2 – Illustration of a sample calendar of Reserve Computation Periods and Reserve Maintenance Periods

Annex 3 – Illustration of the computation and maintenance of Reserve Requirements

Annex 4 – Illustration of the daily accounting entries from/to the Settlement Account and its corresponding Reserve Account

Part A – Overview

A.1 The Central Bank of the UAE ("CBUAE") imposes Reserves Requirements (RR) on Deposit-Taking Licensed Financial Institutions¹ ("Institutions") against specific type of deposits – Qualifying Liabilities ("QL").

A.2 These Regulations -- which are to be complied with as per Article No. (32) of Decretal Federal Law No. (14) of 2018, Regarding the Central Bank & Organization of Financial Institutions and Activities – specify the level of RR for Institutions at the CBUAE and determine the manner in which RR are calculated.

A.3 These Regulations also specify operational arrangements related to the computation and maintenance of the RR along with their use for liquidity management and settlement purposes.

Part B – Qualifying Liabilities and Reserve Requirements Ratios

B.1 QL consists of the following UAE Dirham (AED) and foreign currency denominated deposits:

- Government Deposits
- Other Deposits

B.2 Institutions shall, over each respective Reserve Maintenance Period ("RMP") maintain in their respective Reserve Accounts held with the CBUAE, balances equal to the amounts of their respective RR as calculated on basis of the ratios set in Annex 1 to these regulations, from time to time, by the CBUAE for:

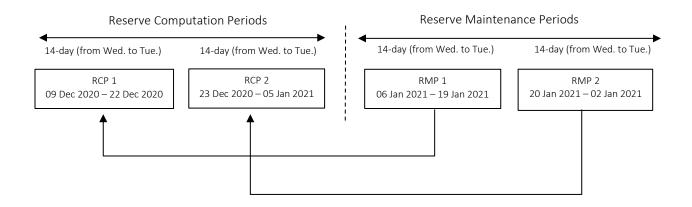

- Demand QL Demand Deposits, Commercial Prepayments (Demand), and Savings
- Time QL Time Deposits (including CDs / Structured Products) and Commercial prepayments (Time)

Part C – Reserve Computation and Maintenance Periods

C.1 RR applied to a specific Reserve Maintenance Period ("RMP") are based on the average daily amount of the QL over its corresponding Reserve Computation Period ("RCP"). Both RCP and RMP shall be 14 days starting on Wednesdays and ending on Tuesdays.

¹ All institutions licensed by the CBUAE to take deposits of all types, including Shariah -compliant deposits.

C.2 The lag between the RMP and its corresponding RCP shall approximately be 2 weeks as illustrated below:

C.3 RR Reporting and Validation: .

Cycle	Computation Period	Reporting date of daily average balances during the computation period	Validation of RR by the CBUAE	Notice to Institutions via UAEFTS
RCP	2-weeks from Wednesday to Tuesday	Within 4 business days from last day of RCP	Within 2 business days from the reporting date of daily average balances of the RCP	Within 1 business day from the validation of RR by the CBUAE

Institutions shall report RR on a fortnightly basis. The CBUAE will notify Institutions about the calendar of the RCPs and their corresponding RMPs through the Banking Return Form no.6 (BRF 6).

C.4 An illustration of a sample calendar of RCPs and corresponding RMPs, along with the computation and maintenance of RR is provided in Annex 2 and Annex 3 to these Regulations, respectively.

Part D – Reserve and Settlement Accounts

D.1 Funds pertaining to the RR (both in AED and foreign currencies) are to be maintained in a separate AED Reserve Account at CBUAE. For settlement purposes, the total balance held in Reserve Accounts shall be computed in AED, by which reserves denominated in foreign currencies shall be converted into AED using the FX midpoint rate as published by CBUAE.

D.2 During the course of each business day and prior to the designated cutoff time [End of Day ("EOD") - 1 hour] of the UAE Funds Transfer System ("UAEFTS"), Institutions will be allowed, at their own discretion, to transfer any amount of funds between their corresponding Settlement Account and their Reserve Account for the purpose of reserve averaging.

D.3 Maintenance of balances in the Reserve Account shall continue to be flexible to facilitate shortterm liquidity management. This will be ensured through reserve averaging referred to in Part E of these Regulations, whereby Institutions will be allowed to draw on their balances held in their respective Reserve Accounts.

D.4 Institutions will not be allowed to have a negative balance in their Settlement Account at EOD.² Should the Settlement Account be overdrawn at the designated cutoff time of the UAEFTS, the concerned institution will be allowed to draw on any outstanding balance held in its Reserve Account. If the funds available in the Reserve Account are not sufficient to cover such a shortfall (negative balance) in the Settlement Account prior to EOD, the concerned institution shall fund the shortfall position through recourse to the interbank market or by submitting a request to access the standing credit facilities of the CBUAE.

D.5 The consolidated balance from the Settlement Account and the Reserve account shall be validated through the UAEFTS.

D.6 Annex 4 attached to this document illustrates an Institution's position at CBUAE during a 14day RMP. The illustration depicts the corresponding daily accounting entries related to its Reserve and Settlement Account, both at Beginning-of-Day ("BOD") and of the UAEFTS and the EOD of the Core Banking System.

Part E – Drawing on Balances held in Reserve Accounts

E.1 Institutions will be allowed to draw on their balances held in their Reserve Account on any day up to 100%, while ensuring that they meet the average RR over the 14-day RMP.

E.2 Settlement Accounts have to be credited to the extent of outstanding balances, held in their respective Reserve Accounts in order to ensure that the Settlement Account is not overdrawn at the EOD. This will generate the following accounting entries: Debit –Reserve Account; Credit – Settlement Account.

² EOD – Core Banking System.

E.3 Funds transferred to offset the negative balance of the Settlement Account shall be reversed automatically at BOD of the next calendar date (opening of the UAEFTS). These funds shall be debited back to the Settlement Account at BOD. i.e., reversing the accounting entries posted at previous day's EOD. The accounting entries in this case will be as follows: Debit – Settlement Account; Credit – Reserve Account.

Part F – Non-compliance with the level of Reserve Requirements

F.1 Non-compliance with the RR arises if an Institution's average EOD balance in its Reserve Account over the 14-day RMP is less than the level of RR for the corresponding RMP.

F.2 Where an Institution fails to comply with the RR, the CBUAE shall impose a periodic financial penalty – to be levied based on the average shortfall during the corresponding RMP. The computation of the Periodic Penalty is weighted according to the number of days in the RMP as specified below:

Periodic Penalty = $\frac{\text{Penalty Rate x daily average shortfall x 14 days}}{100 \text{ x 360 days}}$

Where:

- The Penalty Rate shall be the CBUAE's **Base Rate + 400 bps** and will be applied periodically at the end of the RMP as per Item (1)/paragraph (h) of Article (137) of Decretal Federal Law No. (14) of 2018, Regarding the Central Bank & Organization of Financial Institutions and Activities.
- Shortfall is the negative net balance between the average registered balance in the Reserve Account and the level of RR to be maintained in average during a given 14-day RMP.

F.3 The CBUAE may sanction non-compliant institutions, as per Item (1)/paragraph (f) of Article (137) of the Decretal Federal Law No. (14) of 2018, Regarding the Central Bank & Organization of Financial Institutions and Activities, by requiring them to deposit funds with the CBUAE without return and for a period CBUAE deems appropriate, in addition to any amount prescribed by RR.

F.4 In case of serious violations of RR, the CBUAE may reduce or suspend the concerned Institution's eligibility from drawing on the CBUAE's funds through its standing credit facilities.

F.5 The Periodic Penalty shall be paid on the second business day following the end of the RMP over which the Periodic Penalty was levied.

Part G – Operational Procedures

G.1 Institutions should refer to the guidelines set in the fortnightly BRF 6, the Operational Manual in relation to Drawing on Reserves, and the Rulebook of the UAEFTS issued by the CBUAE.³

³ Refer to Document Code – UAEFTS-AUX502: Technical Implementation in UAE Funds Transfer System & Immediate Payment Instruction (IPI) for Revised Reserve Regime under Dirham Monetary Framework.

Annex 3 - Illustration of the computation and maintenance of Reserve Requirements

The following data will be used for this illustration:

Reserve Computation Period	Reserve Maintenance Period
(RCP)	(RMP)
RCP1: Wednesday, December 9, 2020 –	RMP1: Wednesday, January 06, 2021 –
Tuesday, December 22, 2020	Tuesday, January 19, 2021
RCP2: Wednesday, December 23, 2020 –	RMP2: Wednesday, January 20, 2021 –
Tuesday, January 05, 2021	Tuesday, February 02, 2021

- Base Rate: 10 bps
- Penalty Rate: Base Rate + 400 bps = 410 bps

Step 1 – Computation of Average QL in RCP1 and RCP2

An Illustration on the computation of QL in RCP1 and RCP2 for the corresponding RMP1 and RMP2 is as follows:

RCP1 (Wednesday, December 9, 2020 – Tuesday, December 22, 2020):

Time Balance: Time Deposits (including CDs/Structured Products) and commercial prepayments (Time) in AED Million:

Date	9	10	11	12	13	14	15	16	17	18	19	20	21
Balance	100	96	78	40	90	130	140	98	100	110	80	88	76

Date	22
Balance	110

Average QL (Time Balance) for RCP1 = (100 + 96 + ... + 110 + 110) / 14 = AED 95.4 Million

Demand Balance: Demand deposits, commercial prepayments (Demand), and savings in AED Million:

Date	9	10	11	12	13	14	15	16	17	18	19	20	21
Balance	230	180	150	220	150	180	200	250	195	210	195	197	200

Date	22
Balance	210

Average QL (Demand Balance) for RCP1 = (230 + 180 + ... + 210 + 200) / 14 = AED 197.6 Million

RCP2 (Wednesday, December 23, 2020 – Tuesday, January 05, 2021):

Time Balance (in AED Million):

Date	23	24	25	26	27	28	29	30	31	1	2	3	4	5
Balance	105	96	98	80	84	94	90	98	100	105	78	90	85	100

Average QL (Time Balance) for RCP1 = (105 + 96 + ... + 108 + 101) / 14 = AED 93.1 Million

Demand Balance: Demand deposits, commercial prepayments (Demand), and savings in AED Million

Current, savings, and call accounts Balance (in AED Million):

Date	23	24	25	26	27	28	29	30	31	1	2	3	4	5
Balanc	202	237	208	210	205	215	190	194	195	198	195	188	200	189

Average QL (Demand Balance) for RCP2 = (202 + 237 + ... + 190) / 14 = AED 201.8 Million

Step 2 – Computation of the level of RR for RMP2 and RMP2

To compute the level of RR, assume that RR ratios are seven percent (7%) on demand deposits, commercial prepayments (Demand), and savings (in AED Million); and one percent (1%) on time Deposits (including CDs/Structured Products) and commercial prepayments (Time) in AED Million.

The length of RMP is 14 days starting on Wednesday and ending on Tuesday.

The lag between each RMP and its corresponding RCP shall approximately be 2 weeks. Therefore, for the RMP1, the RR for RMP1 will be based on the average QL of RCP1 while the RR for RMP2 will be based on the average QL of RCP2.

RMP1 (Wednesday, January 06, 2021 – Tuesday, January 19, 2021): In this case, the QL computed for RCP1 will be applicable to RMP1. RR for RMP1 = 1%*95.4 + 7%*197.6 = AED 14.8 Million RMP2 (Wednesday, January 20, 2021 – Tuesday, February 02, 2021): In this case, the QL computed for RCP2 will be applicable to RMP2. RR for RMP2 = 1%*93.1 + 7%*201.8 = AED 15.0 Million

Step 3 – Computation of the periodic penalty for non-compliance with the level of RR

RMP1:

Suppose the concerned institution's daily balances held in the Reserve Account – EOD RMP1 starting from Wednesday, January 06, 2021 – Tuesday, January 19, 2021 are as follows:

Date	6	7	8	9	10	11	12	13	14	15	16	17	18	19
Balance	14	16	15	9	8	8	9	14	13	12	13	12	14	15

The average reserve balance for RMP1 = Sum of daily reserve account balances / 14 days

= (14 + 16 + ... + 14 + 15) / 14 = AED 12.3 Million, which is lower than the minimum daily average RR of AED 14.8 Million.

There is a shortfall of AED (14.8 - 12.3) = 2.5 Million

Therefore, the Periodic Penalty for non-compliance during the RMP from Wednesday, January 06, 2021 – Tuesday, January 19, 2021 is calculated as follows:

Penalty Rate * AED 2.5 Million *14 days / 100*360 days = 4.1 * AED 2.5 Million * 14 / 36000

= AED 3,986.1

RMP2:

Suppose the concerned institution's balances held at the Reserve Account – EOD for RMP2 starting from Wednesday, January 20, 2021 – Tuesday, February 02, 2021 are as follows:

Date	20	21	22	23	24	25	26	27	28	29	30	31	1	2
Balance	21	18	15	14	14	13	15	13	11	11	14	16	19	22

The average reserve balance for January 20, 2021 - February 02, 2021 = Sum of daily reserve account balances / 14 = (21 + 18 + ... + 19 + 22) / 14 = AED 15.4 Million, which is higher than the minimum daily average RR of AED 15.0 Million. Therefore, no periodic penalty to be charged.

Annex 4 – Illustration of the daily accounting entries from/to the Settlement account and its corresponding Reserve account.
