The Money Multiplier

The money multiplier indicates by how much the money supply will grow following an increase of 1 billion Dirhams in the monetary base (currency in circulation + commercial banks' reserves at the Central Bank + certificates of deposit).

The money multiplier of M_1 increased from 1.50 at the end of June 2014 to 1.52 at the end of July of the same year, whereas the multiplier of M_2 increased from 3.94 to 3.95 and the multiplier of M_3 increased from 4.58 to 4.68, during the same period. The said increase in the money multipliers was mainly due to decrease in the monetary base, following an increase in Banks' Current Accounts at CBUAE by AED 9.3 billion and decrease in Certificates of Deposit (Net of Lending) by AED 16.7 billion.

(*) The monetary aggregates are defined in footnote of Table 1
